| 5. Tangan-tangan | |

Aceh Barat Daya Regency relies on agriculture and trade for its eco-

nomc survivals. It is supported by its most strategic position along West Aceh commercial route, especially Blangpidie, a city has been popular as commercial center in western coast of Aceh.

With better security condition and unique position of a blend between beautiful Hindia Ocean and green Barisan Hills, the area has many potentials could be explored like tourism.

In addition, Aceh Barat Daya could be developed as agro-industry, agro-business and integrated livestock areas as well as other developing sectors.

Natural Potential Livestock

Aceh Barat Daya's livestock's are dominated by cow at 2,661; buffalo at 20,161; goat at 56,484 and sheep at 2,661.

Plantation

In chocolate product, Aceh Barat Daya does not want to be left behind other regions like Pidie and North Aceh, Aceh Barat Daya's production reaches 1.758 tons per year. Although its production is little higher than that reached by Pidie, Aceh Utara and Bireuen's production, chocolate gives fairly significant contribution to Aceh Barat Daya's plantation sector. Other farm produces are coconut and coffee.

Agriculture

Majority of Aceh Barat Daya's agriculture is dominated by rice at 14,414 Ha, where 14,297 Ha (99%) of them are irrigated-planted area. With the existing land area, Aceh Barat Daya is able to produce 11.613 tons of rice. Aceh Barat Daya Regency also produces corn, soy bean, and peanut. The three commodities contribute respectively 396 ton, 71 ton and 337 ton per year.

Marine Fishery

Aceh Barat Daya's marine fishery product reaches 8.354 ton per year.

Aqua Culture

Aceh Barat Daya's aqua culture product is categorized better than other regencies at 88.5 tons per year. Actually, with coastal fishpond, fishpond and public waters potential achieving 764 Ha, could make Aceh Barat Daya's cultured fishery product much higher (than other regencies in Aceh).

Mining

Aceh Barat Daya Regency has fairly rich of mineral resources, such as iron ore, zircon and Galena Sand. There are also rocks could be used as mineral fertilizer's raw material.

INVESTMENT OPPORTUNITY

Although agricultural, farming and fishery commodities have been produced by Aceh Barat Daya, there is still no, except oil palm, intermediate processing facilities in creating value added. All of Aceh Barat Daya's agricultural products, both produced by fresh water and marine sectors are sold as is. So that, processing facilities for agricultural, farming and fishery commodities is a promising business opportunity in Aceh Barat Daya.
