**INVESTMENT OPPORTUNITY**

Aside from fishery, Pidie Regency's outputs are also from plantation sector, mainly chocolate. However, unfortunately, chocolate produced by Pidie's farmer are sold without fermentation process that making its selling price low. Whereas in fact, chocolates economic value could be jacked up not only by fermentation process, but further, is in chocolate processing itself, either in the form of butter or powder, to be further marketed to food companies producing chocolate bar domiciled in Jakarta and its surrounding. In many tourism destination objects like Penang, Malaysia, chocolate houses becomes tourism's reliable object. Tourist could not only buy fresh chocolate, but also watch chocolate processing attraction, from chocolate powder up to ready-to consume bar of chocolate
